Preface

A time comes when each individual departs from the body for the last time. Even though most don't remember, we actually leave our body at night while we sleep. On this final soul flight, all earthly accoutrements fall behind, our moorings in time and space, and all that has tethered us to the physical plane of existence and consciousness. We rise into the light and are greeted by loved ones, masters and angels. We move from sphere to sphere in higher consciousness, as veil upon veil of mayic density is drawn behind us. We reach the etheric temples where heavenly masters train souls in the art of becoming the fullness of their God potential. There, we are shown the violet flame.

"The violet flame is the most helpful tool," the master tells us. "When you call forth God's violet

flame, the Holy Spirit descends upon you, to cleanse you until you are made whole again, faithful to the divine image and pattern in which you were created.

"By free will you descended into lower planes of consciousness. Alas, you forgot your divine birthright to be fruitful, to multiply and rule the earth, your fruits are not meet for repentance. Your creations deviate from the image and likeness of God, which is, first and foremost—love.

"You mistakenly used the divine energy animating your life to create imperfect forms, spun of selfish thoughts, feelings and actions. These negative choices must now be forsaken and transmuted by you, so you can be free. The divine energy, trapped in lesser matrices, must be purified and released into pristine patterns once again, so your soul can be redeemed.

"The violet flame is God's precious gift of mercy and forgiveness unto you. Do not neglect it, for it comes to consume negative patterns, to free you from binding karmic entanglements, and to perform the most sacred work of tikkun."

We watch closely as priests and priestesses of the Order of Melchizedek, in solemn joy, invoke the healing action of the violet ray and amplify its action through a magnificent altar of amethyst crystal, that reverberates the light and sound.

Now the divine Word rings forth, penetrating spirit and matter: "He is like a refiner's fire and He shall purify."

The violet flame intensifies as it descends from higher planes of consciousness in a mighty tangible shaft of billowing, comforting, scintillating light. As the beauty of the light increases, the voice of God echoes: "Comfort ye my people. Your iniquity is pardoned. The crooked shall be made straight, and the rough places plain."

Row upon row, souls gather in earnest, to repeat the divine invocation. These are the humble ones, the hopeful ones, the repenting ones who, though out of embodiment, have retained full individuality and consciousness, and awakened to their spiritual responsibility.

Together, we watch as the seventh ray action of the Holy Spirit intensifies in the center of the circle and descends into the physical plane, boring a hole into the mayic density of time and space, Kal-Desh. The violet flame, we are told, is the divine light closest to the physical plane, and we watch as it penetrates veil upon veil, majestically descends from heaven's highest heights to sublimate the grossest levels of the earth. The divine intent rings clear.

"Every valley shall be exalted, and every

mountain and hill made low, and the glory of the Lord shall be revealed, and all flesh shall see it together. For the mouth of the Lord hath spoken it."

"Why is that?" we ask with inquisitive contemplation.

"God has decided to save the earth, and the answer is the violet flame. When people in physical embodiment call forth the violet flame, a tremendous spiritual acceleration takes place. Impeding karma is balanced much more quickly, ushering souls unto their ascension in the light.

"These blessed ones have heard the word of our beloved Saint Germain. They have taken his message to heart. They are pioneers of the Aquarian Age, and forerunners of a golden age to come. They carry the torch of freedom, the lamp of Mother Liberty, truly a violet light that sets all captives free."

"Send us back," we answer with steadfast determination. "Send us back that we too might invoke the violet light, making all things right. Give us a new body we pray, so we can witness unto Saint Germain. Help us take our place on Earth's stage, so we too might be wayshowers of the Aquarian Age.

The master smiles. A flash of violet flame floods his auric field, revealing the fresh and delicate scent of violets in spring. His eyes gently twinkle.

"This you shall," he replies, and his voice

thunders with divine authority. "Unlike these souls, who are your brethren, you are the more fortunate ones. You still have a physical body, beloved Sons and Daughters of God, and a new day of opportunity awaits your overcoming.

"On the morrow, as you awaken refreshed from this retreat experience, you will stretch your body and ponder our encounter as an ineffable soul memory.

"Go find me then, and the violet flame. Won't you, for heaven's sake, make the most of your opportunity, that you might—and all earth—soon ascend?"

One

God's Seventh Ray

More and more people today are looking for ways to transform their lives and heal the planet, from simple recycling, to engaging in yoga, meditation and positive affirmations.

The violet flame is a powerful adjunct for all ground-breaking efforts in higher consciousness. It is a luminous, intelligent substance with an ultraviolet frequency just beyond what our eyes can see, that triggers an alchemical process within us.

The violet flame is a manifestation of the Holy Spirit of God. The Bible tells us that the Holy Spirit is a fire that tries "every man's works of which sort it is." This describes the violet flame as it goes forth to consume negative energy.

There are seven major rays, or frequencies of God, that are like spiritual rainbow rays. Each ray has a specific

divine action in both the spirit and the matter universe. The first, blue ray of God holds the energies of faith, protection and good will. The second, yellow ray, holds the energies of divine wisdom and illumination. The third, pink ray, contains the energies of divine beauty and love. The fourth, white ray contains the energies of purity, discipline and harmony. The fifth, green ray are where the energies of healing, truth, abundance and divine science abide. The sixth, purple and gold ray, are the energies of service, ministrations, and peace.

Now the violet flame is the seventh ray, and holds the highest spiritual frequency through the divine qualities of freedom, transmutation and forgiveness.

The violet flame establishes and reestablishes the rhythm of life, the in-breath and the out-breath, and the pulse of daily living. It fills our lives with a very special divine quality that we need each day, just like we need pure air and water, sunshine, the earth currents and the many star frequencies.

The violet flame was known in ancient times during the advanced civilizations of Atlantis and Lemuria. It was used by priests and priestesses of the sacred fire and by divine alchemists in the ancient mystery schools. Many studied the violet flame in the temples of Atlantis and the knew the efficacy of this flame in healing the body and changing world conditions.

After the sinking of these continents through cataclysm, (which was the result of mankind's misuse of divine energy,) the violet flame was only revealed to people in the etheric retreats of the heaven-world.

Advanced souls could journey to the retreats in soul travel during sleep and receive instruction on the violet flame. Jesus, for example, learned of the violet flame and imparted that knowledge to his disciple John the Beloved. There were also other instances where saints and mystics discovered the violet flame or the violet light in their personal communion with God. One such individual was the Cardinal Bonzano, who ascended back to God upon his passing, in 1927, having sufficiently invoked the violet flame.

Today, many retreats still exist on the etheric plane that focus on the violet flame and we can visit them in our etheric bodies. Souls passing from the screen of life also receive training there between lifetimes and invoke the violet flame through their etheric bodies.

As a result of this inner work, there are at least a million souls, who either on inner or outer levels, are fully aware of the violet flame or have the equivalent of the violet flame, even though they do not have a name for it. Some call it the violet light. They see that light, they are attracted to it, and they attract it into their auras.

Still, it is a lot more efficient to invoke the violet flame while we are in physical embodiment, in order to transmute our physical karma, rather than wait until out of embodiment. When we invoke the violet flame through by using our voice and our intention here below, we are actually accelerating its action, tying it into the most physical aspects of life. Our thoughts, feelings, words and actions directly impact the spiritual ecosystem within our four lower bodies and the planet as a whole, so when we

invoke the violet flame physically, it's even more beneficial.

Two

The Gift of the Violet Flame

Since the sinking of Atlantis, the violet flame was not known on a larger scale until the twentieth century, when the ascended master Saint Germain pledged his spiritual attainment as collateral for mankind to receive an outer conscious awareness of the violet flame.

Saint Germain, who last walked the earth in the eighteenth century as the "wonderman of Europe," chose to sponsor the revelation of this divine energy so that we might experiment with the alchemy of self-transformation through the sacred fire.

Now ascended, Saint Germain's knew his divine destiny was to serve as hierarch of the Aquarian Age in the footsteps of Jesus, the Piscean avatar. He also knew the greatest gift he could bestow upon mankind was to teach people in an outer way what they had learned on inner

levels, namely the soul-liberating power of the violet flame.

Beginning in the 1930s, Saint Germain contacted Guy and Edna Ballard through the I AM Movement and gave them the teaching of the violet flame, making it fully public as a dispensation and an awareness, and reaching hundreds of thousands of people.

One of the reasons Saint Germain sponsored the violet flame was because of all of the madness that was prophesied to come upon the earth in the "last days" transitioning the Age of Pisces to the Age of Aquarius. Saint Germain's great hope was that, by sponsoring the knowledge of the violet flame on a wider scale, many negative prophecies and karmic potentials would not come to pass.

This had good results. From the 1960s through the 1990s, thousands of spiritual seekers then associated with The Summit Lighthouse, invoked a tremendous amount of violet flame under the direction of Mark and Elizabeth Clare Prophet. During those years, many prophecies, including the visions of Nostradamus, did not fully come to pass, the Soviet Union and Berlin Wall collapsed, and the much-feared nuclear arms race de-escalated.

Today, the violet flame can be seen on the internet, in photographs, pictures, and other forms. We see people invoking it, and there is still a lot more that can be done.

The entire planet will be turned around, spiritually speaking, as growing numbers of people invoke the violet flame, to transmute not only the personal karma that we carry, but also the planetary karma of the entire earth, and

the national karma of the United States and every nation.

Any soul who embodies on earth at any particular point in time has to carry a certain measure of what is called "world karma," the karma of the collective. When Jesus died on the cross, he was carrying that balance of world karma, helping to transmute that world karma through his sacrifice. This bought more time for souls evolving on earth to balance their personal karma in subsequent embodiments and keep evolving.

Jesus, hierarch of the Piscean Age, offered his own body and his blood as the light of the Piscean age, tethering us to God. This was reenacted again and again through the ritual of Holy Communion.

Now in the Age of Aquarius, Saint Germain, as the hierarch of the Age of Aquarius, brings us the violet flame as a new form of transmutation, and the way of tethering our soul to God in this age.

Those who give the violet flame each day receive the spiritual equivalent to the sacrament of Holy Communion. They receive the body and blood of God, the light of Christ that comes through the spiritual frequency of the violet flame. The violet flame allows us to balance our negative karma more quickly than simply taking the sacrament of holy communion because we are active participants in a process that requires greater effort. It facilitates our soul's ascension in the light in a much quicker way than to simply balance the karma through suffering and good works, as was done in the Piscean Age.

One of the reasons why it was such a gift for Saint Germain to come forward and sponsor the outer awareness

of the violet flame is because any time an ascended master pledges his or her attainment towards an activity on Earth, that master bears a karmic responsibility for its success or failure.

When an ascended master comes forth and says, "I'm going to give this particular gift to humanity. I'm going to take it upon myself for this teaching to come forth—whether it's sponsoring a spiritual movement, an individual, a specific book, an action like releasing the knowledge of the violet flame, a scientific invention that

can be used for good or evil like the technologies used in war—anytime a master comes forth and puts forth a certain dispensation, that master is responsible for its misuse as well as its good use.

When people invoke the violet flame and basically continue to make negative karma in a major way—meaning they don't really repent of their ways and fix the psychological momentums that have them continually recreating the same problems—this can become a misuse of the violet flame. When people don't earnestly try to increase in divine love and simply continue invoking the violet flame as a way out of their karma, it becomes like the story of Rasputin, who said it's so good to ask for forgiveness and be forgiven so you can go out and sin again, and then be forgiven again. That's another misuse of the violet flame.

The violet flame is the flame of freedom—spiritual freedom and worldly freedom. When more and more violet flame is invoked, and people take that buoyant energy of spiritual freedom and misuse it, they bear a karma for the misuse and the master who sponsors the violet flame also takes on that karma.

Saint Germain also sponsored a lot of the technologies that have come forth in the last hundred years or more. Consider how, a little over a hundred years ago, there were no planes flying in the air, no household appliances, no computers, no televisions and virtually no means of instantaneous long-distance communication. Now consider how fast technology has accelerated, whether its the computers, the internet, the cell phones, or the way

we travel, even into deep space. These inventions were held in the etheric plane and were lowered into the physical plane through people in embodiment who could be receptive to those ideas, under the sponsorship of Saint Germain.

Saint Germain sponsored the violet flame and he sponsored all of this technology so that we would get the word out about the violet flame and the teachings of the Brotherhood of Light. He wanted us to be able to spend more time doing spiritual work, balancing our personal karma and achieving a greater union with God.

It behooves us then, as lightbearers and adepts in the making, to make it so that this technology is used for good, and so that the violet flame, when invoked, is also used for good—transmuting darkness and increasing our spiritual awakening on a personal and planetary scale. This way, even though Saint Germain has to hold the balance for those levels of misuse, he receives a greater boon for the good that has come forth, even from his own causal body of light.

The violet flame is ultimately going to be the deciding factor as to whether Earth moves into a spiritual golden age or whether we move into a dark age in consciousness. We can see these two trends and potential outcomes happening around us all the time—the trend towards light and the trend towards darkness. As we invoke the violet flame, we want to see that violet flame coming forth to dissolve the darkness, awakening consciousness so it is receptive to the light—within ourselves and within all people of the light.

Three

The Violet Flame in our Four Lower Bodies

Let us consider the picture then, of the man or woman sitting under his or her own vine and fig tree, like the apostle Nathanael, whom Jesus saw. The fig tree represents our causal body of light above us where our good works—our treasures in heaven—are stored. All good thoughts feelings and actions rendered in any twenty-four hour cycle spiral up to the causal body and are stored there as permanent atoms of God.

There is a reservoir of violet flame within our causal body. These are the energies of divine freedom, forgiveness and transmutation that we generated and served, both in this and past lives. Every time we invoke the violet flame, an action of violet flame descends from our causal body as a shower of blessing, and then is

multiplied by the masters who have sponsored the violet flame, like our beloved Saint Germain, and all of the masters and angels who serve the seventh ray.

When the violet flame descends upon us, it literally dissolves dark forcefields of energy. These include the accumulation of negative thoughts, feelings and actions that we have engaged in, and that we carry around in our aura as “electronic belt” substance. The electronic belt looks like a kettle drum from the waist down, where negatively qualified energy trapped in our auric field awaits transmutation.

Our auric field or “egg” is the sum of our four lower bodies—our etheric, mental, emotional and physical body. These are our soul vehicles.

The physical body is the only soul vehicle we see with our physical eyes, and it reflects the health of the other three bodies. The emotional body is our largest body. It permeates the auric field with a momentum of habituated feelings and emotions. It stores all of our subconscious memories, reactions, impressions and desires, whereas the physical body stores all of our unconscious memories, reactions, impressions and suppressions. Our mental body ties into our conscious mind and contains our habituated thought patterns. Our etheric body, or etheric double, is the body closest to our physical form. It is the

body with which the soul travels when the physical body sleeps, and also at the change called death.

When a person dies, the physical, emotional and mental bodies are dissolved, but the etheric body carries on. This body has been called the memory body because it holds all of our soul's records of earthly experiences, from every lifetime. When a soul readies herself to come back into embodiment in a new baby body, that new body is formed based on the blueprint stored in the etheric body, according to the karmic patterns.

There are two levels or frequencies held within the etheric body. The higher level ties into our Christ potential and holds the divine blueprint of our I AM Presence, God's perfect divine ideation for our lifestream. The lower level or frequency contains the karmic patterns of misqualified energy generated through negative thoughts, feelings and actions in this and past lives. These are the karmas and lessons that we must come back to master, and they register in our etheric body as a sticky substance or soot.

Brian, had two out-of-body experiences in his early twenties, where he remembers consciously traveling back up to the heaven world. This kind of "out of body experience"—or OBE—is not uncommon for people who have had near-death experiences.

During one of the OBEs, Brian was taken into the higher etheric plane by angels, where he was cleansed by the power of sound. He recalls how the angels used a spiritual note that sounded like a "high C" to vivify his etheric body. He remembers looking at his etheric body, which, like the physical body, is covered with follicles.

Instead of hair, the follicles on the etheric body contain a receptor, and the end of that receptor looks like a egg-flipper spatula. These “spatula-like” receptors are intended to capture the divine currents of energy released from our higher self so we can be more attuned with that higher self.

Brian was shown how these receptors were matted down with a crusty energy substance that looked like dry mucus. The flattened receptors could not function as intended. Then, when the angels sang the notes of God, the power of sound released raised the receptors back up, tuning Brian's etheric body. this has helped him be more sensitive to the higher frequencies of the heaven world, even while serving in physical embodiment.

Brian was also shown that the violet flame, when invoked, will transmute not only the karmic soot in our lower etheric body but also help raise our etheric receptors so we can better attune to our higher self.

The Fifty-One Percent Dispensation

One of the most important things to understand about the violet flame is how it relates to another very special dispensation granted to souls in embodiment by those masters who are known as the Lords of Karma.

This dispensation, released in the twentieth century, is known as the “fifty one percent” dispensation. What it means is that a soul who has balanced 51 percent of her negative karma can go through the ritual of the ascension

at the conclusion of her last earthly life. She will then balance the remaining forty-nine percent karma, or percentage thereof, on the etheric plane—by giving violet flame and by doing good works from the etheric plane.

Before this dispensation was granted, people had to balance one hundred percent of their karma to ascend back to God. Now, there is an expanded opportunity for more souls to return home to God permanently as a mighty harvest that has been prophesied—“mass ascensions from the hillsides.”

To balance fifty-one percent or more of our personal karma, the violet flame is an indispensable adjunct. What happens, generally speaking, is that most souls who are attracted to these teachings—whether it's this book or other teachings of the ascended masters and the heaven world—have balanced at least 25 percent of their personal karma. Souls who have not balanced at least 25 percent of their personal karma are not awakened enough to find interest in these teachings, or to even become aware of them. The reverse is also true. People who are interested in these teachings—even this very teaching on the violet flame—have likely balanced at least 25 percent of their personal karma.

Now what we have also been told is that if we are willing to invoke the violet flame each day as the spiritual mantra, a minimum of fifteen minutes, we can—generally speaking, once again—balance approximately one percent of our personal karma each year. Some souls have more karma than others, so those percentages may vary. Nevertheless, this general “rule of thumb” gives us a better

sense of what the violet flame will do for us.

People who daily offer violet flame mantras with earnestness for fifteen minutes or more, after finding this teaching on the violet flame, can, in twenty or thirty years, accelerate to the place where they are ready for the ascension. The only thing that would prevent that is if they had, for instance, murdered someone in this life, or had a specific karma that would absolutely require their reincarnation.

This is tremendous and wonderful news! If you read this book and give the violet flame each day, your soul will most likely be set free from the rounds of rebirth at the conclusion of this life, and prepared for the ritual of the ascension.

Now we have to understand that as we balance more karma, and move beyond the fifty-one percent, we get into deeper karmas and more challenging psychological momentums. That's because we have moved into the emotional body portion of balancing karma.

On our life's journey, we go around the cosmic clock . We move through the first quadrant, balancing the first 25 percent of our karma. This happens on an etheric level and we are not even conscious of our progress in an outer way. Then, we become conscious of the violet flame and the path of the ascension, and enter the second quadrant where we will balance 25 to 50 percent of our karma. Next, we move to the third quadrant—the emotional quadrant—where 50 to 75 percent of our karma comes up for resolution.) Finally, we move through the physical quadrant and balance the remaining 25 percent of our karma.

Even though we have the opportunity to balance our karma and potentially make an ascension within twenty - five years, as we get into higher numbers of balanced karma, we confront more challenging initiations.

Balancing karma in the emotional quadrant is most difficult. We have to descend into our own underworld of astral creations, our personal "death and hell." We have to scour the astral plane clean of our emotional

miscreations, from this and all past lives.

This is when we need the violet flame more than ever, to help us dissolve those elements within our psyche that would hold us back from balancing 100 percent of our karma. The violet flame helps us to extricate ourselves from those traps and "snares of the devil," described by Saint Patrick in his Lorica for Protection.

Souls who reach the 51 percent and then go beyond that percentage, experience the spiritual path as deeper and deeper, and harder and harder. The level of service required increases significantly. The violet flame can help lighten our load. We release our burdens in the violet flame and see the transmutation taking place.

The violet flame assists us, then, to move forward on the spiritual path past the fifty-one percent into the most challenging initiations. Ultimately, we want the violet flame to always be infusing our aura and being in light, unto our ascension. We've been told there is no greater gift than the violet flame by so many different masters of the Brotherhood of Light serving on so many different rays of God. The violet flame is truly the key to help make a positive difference in our personal soul evolution, and for the planet as a whole.

My Personal Experience

I would like to share with you my first personal experience with the violet flame. When I first found out about Saint Germain and the violet flame, I was travelling through South America.

One day, I was sitting in a circle with a group of people on the outskirts of Buenos Aires, who knew about the violet flame, Saint Germain and the teachings of the I AM that I AM.

We started to invoke the violet flame together, saying prayers out loud in Spanish that invoked the violet flame. Now we know that any time two or more people gather to pray, the spiritual action is multiplied so it is actually a good thing to invoke the violet flame with other people whenever you can.

We sat in this circle, making invocations to the violet flame for about two hours. When we finished, my body was so filled with light, joy and love that I could hardly feel my feet touching the ground as I walked out of the room. It was such a converting experience to feel the violet flame flood my being in such an intense way that I knew I had found the path.

I knew I had found my connection to God and my way home. Up until that point, I had been looking

for the best way to meditate upon God and when I found the violet flame, I knew this was the way God wanted me to meditate, and commune with him. All of my prayers had been answered, and the violet flame filled me with such a sense of joy and beauty and wonder.

When a person is introduced to the spiritual path and teachings of the Brotherhood of Light, there are boons and dispensations given to show them what these teachings will actually do for them—converting moments. Then as we continue on the path, we have to become more and more responsible. We move from the “child of God” stage to the “Son and Daughter of God” stage. Our responsibilities increase and so does our ability and obligation to carry more weight, whether it's our own karma or the planetary karma.

The vivid spiritual experiences that we enjoy initially may become more seldom as we keep moving forward, but this does not mean that the path of the ascension is no longer a reality, or that the violet flame will not continue to transform us. It simply means that at different stages, we have to experience different levels of heaviness—energetically speaking—to gain greater self-mastery.

Nevertheless, when we invoke the violet flame, especially in larger groups of people, we can enjoy a sense of bliss, harmony, and upliftment—feeling the

light! This is because a certain amount of the weight of our personal karma has been lifted, as well as for the planet as a whole. Therefore, the more we experiment with the giving of violet flame mantras, the more likely we are to experience this joy and sense of levity.

Four

Life-Changing Personal Benefits

The violet flame is intelligent, luminous and directed by the mind of God. It consumes all that is unlike his presence, by raising the vibration of all it contacts with a spiritually harmonizing effect. The more we invoke the violet flame, the more benefits we can experience. Even though it is impossible to enumerate exhaustively all of the benefits of the violet flame, we are going to focus on seven major benefits. Because the violet flame is a divine energy, it will perform whatever we call for, within the scope of the will of God. With the violet flame, we can do anything that we desire and set our mind to. We need have no sense of limitation, for the violet flame is unlimited.

1. The first benefit is that the violet flame transmutes karma before it even crystallizes, and also at the atomic level.

Each day, there is a descent of karma from our lower etheric blueprint, a certain level of karma that we have to balance, whether from this life or from a past life. It's the daily allotment Jesus referred to when he said, "Sufficient to the day is the evil thereof." We daily have to tend to this allotment or sense of heaviness. It is dropped on our door step, so to speak.

Now when we invoke the violet flame, especially in the morning, a lot of that karmic energy can be transmuted, and sometimes even all of it. Oftentimes, only a token is left so that we can learn the lesson behind the karma. When the entire karma can't be transmuted, it's because we need to understand and mentally cognize the karmic lesson. If it were all transmuted, we wouldn't experience it in a way where we then make a conscious decision to not recreate that kind of karma again.

Each time, we invoke the violet flame, we understand that a greater part of our karma is going to be balanced and transmuted, and that what is left to experience is going to be a percentage, a fragment, a token of what would initially have been the whole package. This is wonderful because as we keep moving forward on the spiritual path, we have more karma to balance, whether it's our own karma or the karma of the world. The violet flame can come in and assist us in transmuting that karma, even before it fully crystallizes in the physical plane.

Everything in life is energy, and this energy affects the way we we respond mentally, emotionally and even physically. Negative energies that come from burdened thoughts, feelings and actions accumulate in the wide open spaces between the electrons and the nuclei of the atoms. Because we are co-creators with God, we must deal with the boomerang effect of the negative energies we impose upon life, consciously or unconsciously.

This creates a negative returning karma, that is like a fine soot that crystallizes as it falls, deadening our soul faculties, dulling our brain and breaking down the cellular structure of our body. Believe it or not, this energy can be as hard as concrete or as sticky as molasses as it registers spiritually, mentally, emotionally and physically within us, causing aging, physical degeneration and illness, mental recalcitrance, hardness of heart, a lack of sensitivity to the needs of others and to the Holy Spirit.

The violet flame is the divine energy that is closest to the physical plane. It works at the atomic and cellular level to transmute negative karma and negative energies before their destructivity settles into the pores of our skin, is absorbed into our bloodstream and makes its way into our bone marrow, brain and central nervous system.

The violet flame sets free human energies that are trapped in downward, negative spirals and restores their perfect vibrational blueprint, electron by electron. It fills the wide-open spaces between the electrons and the nuclei of the atoms where the residue of negative thoughts, feelings and energies accumulate. It literally transmutes the sticky substance—the heaviness, the grayness, the darkness—so that we feel more vivified within our mental, emotional and physical body.

When the violet flame is invoked, it passes through and loosens this dense substance, transmuting our negative karma and transforming it into light. Each time we apply the violet flame to recalcitrant conditions and surrender these unwanted conditions into the flame, the spiritual fire instantaneously begins the work of breaking down the dense particles of misqualified energy from our lifetimes within the mass consciousness.

As we begin to use the violet flame, we will experience feelings of joy, lightness, hope, and newness of life. Oppressive self-sabotaging momentums of thought and feeling literally melt in the flame, as though clouds of depression are being dissolved by the very sun of our being.

2. The violet flame makes us look younger and live healthier lives

The violet flame has been called the fountain of youth. It rejuvenates our body so we appear more youthful. There is no doubt about that. I have seen a lot of people who have given the violet flame for years, and people who earnestly give the violet flame look ten to fifteen years younger than their age, on average, and sometimes more.

The violet flame can actually change physical matter. It can penetrate the bloodstream, the nervous system, the glandular system, the brain, and even bone substance to keep the body in a point of suppleness, self-regeneration and rejuvenation. It also assists in detoxification, emptying the cells of undesirable substances, and is a helpful adjunct to any weight loss program. The violet flame washes the cells, atoms and organs of accumulated karmic and toxic substances. The result is “cosmic,” rather than “cosmetic” surgery.

The violet flame is a key to longevity. It helps our skin stay smoother and makes our eyes really sparkle. People who have invoked a lot of violet flame energy have a buoyancy about them, a more youthful energy and a spring in their step.

The master Saint Germain said there's no beauty cream, no cosmetic that can make us look as beautiful as the light of God focused through the violet flame. It literally fills us with a beauty that is divine, and that's not something a cosmetic can supply!

Every day, the violet flame flushes out and renews our cellular structure until each cell glistens in the sunlight, dazzling as a pure molecule of being.

Because the violet flame is close in vibratory action to this earth substance—and its chemical elements and compounds—it can combine with any molecule or molecular structure, any particle of matter, and any wave of light, electrons, or electricity. This makes it the supreme antidote for physical problems, food poisoning, chemical waste, toxins, and pollution of drugs in the body.

The violet flame helps us to stay in embodiment longer, balance more karma while we're here and look younger in the process! It will likely add years to our life and make those years more profitable spiritually and

happier. So it's definitely worth doing, even just for this benefit alone!

3. The violet flame increases our productivity

The violet flame quickens our mind, and increases our productivity. Regular use of the violet flame melts and dissolves mental density and momentums of ignorance, while it accelerates the function of the mind. It also helps us focus and sustain our attention, increasing the capacity of every moment so that we can accomplish more.

The more violet flame we invoke, the sharper we become, and the quicker we think, communicate, and perform. We find that when we give the violet flame each day, we are actually more productive in getting our tasks done. So when our recalcitrant not-self tells us that we really don't have fifteen minutes to give the violet flame because we have so much to do, we can resist that lethargy. We know that if we give those fifteen minutes of violet flame, we will actually be more productive in everything else. If we have to clean the house or do something very physical, we can give the violet flame as we're doing these tasks and find that our tasks become lighter, easier to "cut through."

4. The violet flame heals our relationships

The violet flame is an energy of forgiveness. It helps us to forgive ourselves and others of past errors. It

completely frees us from sin—cause, effect, record, and memory. It is like a rapidly spinning top, spinning off whatever comes near it. Giving the violet flame assists us to more quickly free ourselves and others, to be less attached, even to our self-righteousness. We can let go of any sense of injustice and then let God be the adjudicator.

When we are in the energy and frequency of the violet flame, we have less of a need to hold on to grudges. We can put them in the violet flame and move on. We are less attached to those things that would pull us down. We have less of a desire to hang onto conflicts. It's like we have less hooks into the conflict because the hooks have been dissolved. The violet flame is accelerating us to the place like where Jesus said, "The devil comes and finds nothing in me." We don't engage in these heavier energy fields.

We can direct the violet flame into the cause and core of all conditions, known or unknown, conscious or unconscious, of hatred and non-resolution. We can direct it into any and all problems and arguments that we have ever had with people, and it will diminish our conflicts with others.

The violet flame dissolves anger towards others, as well as the core anger toward God we tend to carry when we don't think our life has panned out the way it should. It dissolves hardness of heart and transmutes the brittle pride of the intellect that enslaves the soul. It helps us to resolve our desire to be one-up on others, or to give an enemy "his due."

The violet flame equalizes the flow of energy between ourselves and others, and helps us balance our debts to

life. It even helps us resolve unhealthy relationships with money that manifest as greed and avarice, and that would entice us into unhealthy business relationships.

The violet flame penetrates our solar plexus, the energetic seat of our emotions. It consumes everything from mild dislike and irritation, to fears, traumas and tragedies from this and previous lifetimes, that otherwise paralyze the soul and the heart. It is as though our emotions were being dunked in a chemical solution of purple liquid which dissolves the dirt that has accumulated for decades on the latticework of our feeling world.

The violet flame can be directed into the most resistant and recalcitrant pockets of our subconscious, those "psychological hang-ups" which we most desire to have removed. It goes after the schisms that date back to early childhood and previous incarnations, and cause psychological problems that are difficult to shake. Within an hour of giving violet flame mantras and visualizations, we can transmute a particular programmed momentum of an entire embodiment.

Given faithfully, the violet flame will gradually remove fear of death, fear of the future, fear of the powers-that-be, and even the fear to live a life that culminates in a spiritual victory.

As these issues and burdens dissolve from our lives, we experience a new joy in the heart, a new love, a softening of consciousness, more compassion and sensitivity to life.

The violet flame assists in all of our family and work

relationships, by helping to balance old karmas and hurts, and ushering greater harmony. It is even helpful to invoke the violet flame for our pets, who hold an energetic balance for us.

When we give the violet flame on a regular basis, we begin to notice positive changes not only within ourselves but also within our family members and those with whom we work closely. It seems to rub off on them as well. That is because the very same wavelength of unresolved issues found in our own subconscious momentums can to a large extent be consumed in relatives, as well as in those of similar genetic strains, national traits, geographical or economic influences.

Calls to the violet flame greatly enhance our spiritual protection and that of our loved ones, and all for whom we pray. Whatever problems we see when we look at our home life, our family and our children, we know that the violet flame can and will make the difference!

5. The violet flame fills us with joy

The violet flame goes through the emotional body. We invoke it for our emotional body and it helps us to heal. The violet flame lifts our emotions and heals depression. It is as though clouds of depression and dark, dank negative energies melt are being dissolved, melting in in the fervent heat of freedom's violet fires.

The violet flame is a cool flame and yet it can feel warm, even hot, as it contacts the toxins in our being and

the misqualified substance. When the violet flame contacts misqualified substance, it also activates negative related karma so that that karma may come to light and be cast into the sacred fire. When we have a good session of violet flame, we can really feel the transmutation happening within the auric field.

We can literally give the violet flame to the place where there is sweat trickling down our back, as we're sweating it out. This has happened to me a number of times. It's so physical that you can literally feel the heat physically. We know that it's a good thing because there are levels of substance being transmuted that have to be consumed. Then, after giving the violet flame for a long time, it becomes a comfortable cool feeling.

The violet flame can truly be the cup of comfort in every home, replacing alcohol, sugar, nicotine, drugs, and all kinds of addictive habits that we use to fill an inner void. The violet flame fills us with buoyancy and joy. After a violet flame session, we may feel the desire to just laugh and be "high" on God! It's tremendous, better than any drug. It's a sign that God lives in us and is greater than all else.

6. The violet flame helps us remake our history

The violet flame transmutes negative records. What this means is that we can literally go back into the past — whether it's in this life or past lives—and we can see in our mind's eye past moments of pain, hurt and abandonment,

moving into the flame to be consumed. We can step out of the old mold and say, "I am complete and whole. I have no need to hang on to that record!"

As much as the negative events from this life and past lives are crystallized and seem absolutely real, they are actually in a way, like a movie—a movie reel! That's because even though negative events are very real on one level, on another level, they are not real. Nothing is real unless it is made permanent and real in God, and only that which is good can be stamped with permanency.

This means we can go back and recreate the past. We can see negative events that took place be dismantled and dissolved if we are willing to let go of our attachment to them, of our sense of identity as it relates to them.

Through the spiritual acceleration and divine grace of the violet flame, we no longer have to be held to this or that misdeed, as stated by the prophet Jeremiah: "I will be their God, and they shall be my people. For I will forgive their iniquity, and I will remember their sin no more."

The violet flame also reminds us of the words of the prophet Isaiah: "Though your sins be as scarlet, I will make them white as snow. Though they be red like crimson, I will make them as wool."

We can literally see the records disassemble as if we were taking a movie reel or a video in a VCR and playing it backward, rewinding it. When you push the play and the rewind button simultaneously, you can see past scenes taken apart. Likewise, we can go into our past and see the negative events literally being rewound through the violet flame, and transmuted. Then, that energy is freed so that

we can create new expressions that are good, new patterns of divine expression.

7. The violet flame helps us better connect to our higher self

The violet flame helps us to balance karma more quickly and connect to our higher self. The more karma we balance, the more we can connect to our higher self. What happens is that our higher self—or Holy Christ Self—works with us to the extent that we are usable instruments. The more we balance our personal karma, the more useful we become to our higher self. So long as we have a lot of personal karma to deal with and balance, we can't really be doing the work of God to a greater degree. We're still cleaning up our world. The faster our world is cleared, the greater the service we can render. The more accelerated our lives become in service, the more the contact with our Holy Christ Self is activated.

The violet flame also tunes our spiritual energy centers. It presses through the chakras, swirls through the etheric body, clearing the chakras and aura so that we can become more connected to our higher self. The more we give violet flame mantras, decrees and songs, the more we transmute the blocks that exist between our soul and our divine self.

When we use the violet flame, we surrender the impoverished self, the lesser self. We let the energies of the violet flame unlock our true divine self, even as they sweep away the encrustations of the synthetic self. The

more we use the violet flame for renewal and self-transcendence, the more we find ourselves in the image and likeness of Christ.

The violet flame is the means of conveyance from one octave to the next, and from one heaven to the next. When our aura is sealed in violet light, our soul passes from the Matter cosmos into congruency with the Spirit cosmos.

Because the violet flame helps us to balance karma more quickly, it ultimately helps our soul achieve immortal life. Our need to balance karma keeps us chained to the wheel of rebirth, and when we become karma-free, we become spiritually free. We can permanently ascend back to God after the change called death and evolve in the higher frequencies of the etheric plane. We are no longer tied to this earth plane.

Five

Healing the Planet

Just as it heals our physical bodies, the violet flame and also change physical conditions on planet earth. All obstruction comes through the degeneration and the very crumbling of physical matter. In both organic or inorganic matter, the disintegration spiral that takes place over time in buildings, in the land, in the sea, and in our bodies is best counteracted by the violet flame.

The violet flame can be used to transmute the harmful effects of pollution, and reestablish environmental equilibrium to the earth. It also reestablishes a balance in the flow of supply and can be directed into economic and financial conditions.

The violet flame addresses social issues, It is the very solution in all of these places we see, as we sit before the news and stare in wonder at the atrocities being

committed. It is the antidote to all of the social ills that lure young people into a downward spiral of spiritual, mental, emotional or physical degeneration and death. It is also an answer to bacterial and viral outbreaks that may or may not have a medical cure.

The violet flame can dissolve the causes of war, before they hit the physical plane, and render harmful weapons ineffective. Applied properly and with earnestness, it can even deactivate nuclear energies. When all seems hopeless, the violet flame becomes the alchemical solution at both a spiritual and physical level. It will also clear the way for new technologies to come forth, including the access to infinite, or "zero point" energy, that was available in ancient civilizations and tapped into through the work of Nikola Tesla and other cutting-edge scientists.

When we invoke the violet flame in our life, it goes forth to bless life on a planetary scale. That's because at a spiritual level, we are all connected through an antahkarana, or "web of light." What each person does affects the entire collective consciousness, and when a person engages the violet flame energy, their spiritual effectiveness is multiplied by the entire heaven world.

Overcoming the Fallen Ones

The violet flame dissolves the strongholds of the fallen ones, those individuals with dark intent that Scott Peck called, "people of the lie." The fallen ones are souls who rebelled against God in heaven and God incarnate in

man as our own Christ potential.

Like Jesus said, they worship the "devil," their own deified energy veil. Some of these individuals are in embodiment. They pollute the cultural environment with vile thoughtforms, feelings, sounds and rhythms, and manipulate the policies of economies and nations. Others operate from the planes of hell on the astral plane, to influence embodied individuals who resonate with them and who are bent on selfishness.

The fallen ones have no conscience, but know how to come across—at least most of the time—with socially acceptable behavioral norms. Many times, in fact, these spiritually depraved ones become trendsetters in the arts, the music and the motion picture industries, in national and local governments, and even in churches and philanthropic ventures. They ensnare people of light to their cause and parasitize the energy of the lightbearers, be it goodwill and sympathy, money and labor, or even fear and criticism. No matter the quality of our relationship with these ones, they feed off the exchange. The best thing is to withdraw, to stop playing by their rules and to create new rules of service and "fair trade;" to be, like Jesus, "about our Father's business" and then to call forth divine adjudication.

Sometimes, the darkness of the fallen ones is apparent. Other times, it is more subtle, hidden behind wall of sophistication described by the Rolling Stones in the song, *Sympathy for the Devil*.

"Please allow me to introduce myself, I'm a man of wealth and taste. I've been around for a long, long year,

stole many a man's soul and faith ...Pleased to meet you. Hope you guessed my name, but what's confusing you is just the nature of my game...So if you meet me, have some courtesy, have some sympathy, and some taste, Use all your well-learned politesse or I'll lay your soul to waste."

Speaking of these ones, Jesus said, "By their fruits shall you know them." We must truly examine, as the song says, the "nature of the game" that they plot behind the scenes, and the end result.

Ultimately, they only work to increase their power and global hegemony. That's the "bottom line" they defend as they further their agenda, with no regard for human life or the environment, unless it serves them. They have learned, over time, how to dodge their karma and make others shoulder the responsibility. They insulate themselves from any negative returning karma by amassing wealth. They also work to generate enough good karma from sideline humanitarian work and "public relations" to secure another incarnation.

It is time for earth to be rid of these tares among the wheat. It is time for these ones to receive the final judgement of Almighty God, and we must call it forth. The apostle Paul said it clearly: "Know ye not that ye shall judge angels?"

This, the violet flame will do because the violet flame is the flame of the Holy Spirit and, as recorded in the Bible, the sin against the Holy Spirit cannot be forgiven. What this means is that when the fire of the Holy Spirit comes to "try every man's work of which sort it is," what cannot

merge with the flame and crystallize into divine permanency is consumed by the flame. This is the prophesied trial by fire that comes upon us individually and collectively.

Wherever there is darkness, there are forcefields of dark energy. These are places where the astral plane is very thick, strong, and dark, creating vortices of negative energy. These can be felt, for example, at rock and rap concerts, abortion clinics, places of war, pornography and prostitution, inner city drug trafficking, even bars. Wherever the darkness intensifies, there is a void of light.

We can see the violet flame, then, going into these places of intense pollution—physical pollution and spiritual pollution—dissolving that pollution and restoring the energy to its divine purpose. Where we see chemtrails in the sky, we send forth the violet flame. Where we see pollution in the ocean, we send forth the violet flame.

Ultimately, the violet flame dissolves the strongholds of the fallen ones, the mental and emotional strongholds of consciousness that the force of darkness uses to do dark things. We can see the violet flame coming in to basically dissolve their base and consume their parasitical ties. That's very important because without a base of darkness, and without access to the light they habitually steal from the children of God and feed from, they become a lot less powerful.

Help in Times of Cataclysm

The violet flame also brings comfort and succor to elemental life. The elementals are the beings of fire, air water and earth. It's the nature kingdom, the platform of life all around us. Everything around us is made of elemental substance, and some elementals have more of an individuated intelligence than other. We know their burden—the burden of the whales and the dolphins, and the birds and the bees and the pine trees and all of the animals and flora—because they are helping us to carry the karma of the world.

When we invoke the violet flame, we can see it going forth to transmute the negativities, the heavinesses, the densities, the conflicts, the butchering—and freeing the elementals. We can see the violet flame moving into the clouds and the skies and the waters and the earth and the consciousness of the people.

Everyone in their consciousness is, to some degree, lightening the load or burdening elemental life. Most

people, sadly, still burden elemental life because we're engaging in negative feelings and negative thoughts and all kinds of physical pollution. The violet flame can come in and clean that up. It will help the elementals in our house, our town, our nation and around the planet, so they can do better and thrive in harmony. On behalf of the elemental kingdom, we need that violet flame and we call to the angels and masters who serve on the etheric plane for assistance in multiplying and maximizing our efforts here below.

The violet flame dissolves negative prophecies. We know that all negative prophecies are given so they can be transmuted. No negative prophecy is ever given so that it comes to pass. The negative prophecies are given as a warning of what could come to pass karmically if the course has not been changed.

When we give the violet flame, we are helping to change the course of history. We are helping to dissolve negative prophecies so they don't have a stronghold, a place in which to anchor. The karma of the group involved is such that it does not warrant the fulfilling of the dark prophecy. The consciousness of people has been raised to the place where that prophecy can't grab hold.

When I read of these different prophecies for this time, prophecies like people having microchips implanted into them, or prophecies of war and terrorism on a mass scale, or the full suppression of freedom, and all of these things that we see as potentials and plans of the power elite that are continually being exposed—we know the violet flame is mitigating the outcome.

The violet flame is helping to expose what is plotted behind the scene and on the astral plane and transmuting the "worst-case scenario" potential, so it does not have to fully erupt in the physical plane. Now if these dreadful things don't come to pass, it's a wonderful thing. We don't have to have a nuclear holocaust or massive plagues, or the suppression of freedom and the complete dismantling of the American constitution.

We can have it so that what comes to pass in the outer world is only a token karma of what could have happened, if left unchecked by the violet flame. The negatives are basically dealt with and balanced on inner levels through the violet flame.

We can see the transmutation taking place on the astral plane, at the emotional level, with its corresponding mental and lower etheric blueprint tie-in, so the worst-case Armageddon scenario does not have to come to pass on the physical plane.

With the violet flame, nothing stays the same. Everything is in flux. Everything is an acceleration. Therefore, nothing is set in stone in terms of prophecy.

The violet flame also transmutes pollution. Just as the violet flame goes into our body at the atomic level between our protons and neutrons and electrons, rejuvenating us and giving us that buoyancy and light at the cellular level, so will it do so on a planetary level. It can literally transmute pollution and even nuclear waste. That just shows how physical the action of the violet flame can be.

One of the things that I've seen in my own life that I attribute to the violet flame is when there was all of the oil spill in the Gulf of Mexico a few years back. This was such a sad event. It looked like such a dire outcome, not only for the gulf waters, but also for all of the ocean currents of the world.

A number of people got together and started giving lots of violet flame. I was visualizing the violet flame passing through all of these water pathways.

Now, looking back, even though we know there was damage, even though it created problems for the ecosystem, we can see that the level to which this catastrophe could have escalated was greatly mitigated.

Not long ago, I bought some shrimp from the Gulf of Mexico here in a grocery store in Montana and those shrimp were perfectly good! I thought to myself, "Wow, what a miracle, that that whole entire ecosystem wasn't completely obliterated by this oil spill." What a grace that the prayers and the violet flame helped on the level we could call "hyperphysics," to clean things up so that at the physical level, life can still continue. It doesn't mean that there isn't residual pollution, but the negative potential

outcome was greatly, greatly mitigated. It became a token karma for the planet that can be managed.

Wherever there is pollution and disaster, we send the violet flame, we send our prayers, and we see that the worse case scenario does not come to pass. This happens over and over again—from the bird flu and swine flu expected epidemics that did not come to pass, to the nuclear escalation with North Korea. The prayers that were given changed the negative expected and manipulated outcome.

We also saw this in the case of the nuclear reactor explosion in Fukushima Japan. So many people were giving the violet flame and invoking the light of God and it helped clean that pollution up. Even though the radioactive leak was a terrible thing and created local damage, the amount of damage that was predicted to come across the Pacific was held in check. There was, of course, some damage—higher levels of radioactivity were recorded on American soil and in cow milk.

Nevertheless, life continues to be sustained without major radioactivity, and we can still keep on keeping on. Same as whatever is coming down from the skies through the chemtrails. The violet flame and all the spiritual work is absolutely essential in mitigating what is being thrown at us on a planetary scale.

We must not forget that while we are invoking the violet flame through our physical bodies, many souls, angels and masters are also invoking the violet flame in the retreats.

There are a number of spiritual temples or retreats on

the etheric plane that focus an accelerated action of the violet flame, like the retreat of Archangel Zadkiel and Holy Amethyst over the islands of Cuba. Souls can journey there at night and between embodiments. This spiritual action is helping the earth as well.

Now what we often find is that in the geographic areas where these retreats, focusing the flame of freedom, are located, there is an attack on that flame, or an abuse of that flame in the physical plane. In Cuba, under the violet flame retreat of Archangel Zadkiel, which has been there for millennia, we see communism and the suppression of freedom as the misuse of the violet light. In Bei Jing, under the violet flame retreat of Kuan Yin's mercy flame, we find communism and many human rights violations.

So where we find the violet flame in the etheric retreats, we can find a corresponding misuse of that flame and perversion of that flame in societies that suppress freedom. Nevertheless, that violet flame goes out to the entire planet from these points of light and we can pray for the overturning of the misuse of freedom in those places.

This turn-around in consciousness seems to be taking place in Angola, where the violet flame retreat of the Elohim Arcturus and Victoria is located, as well as in Romania, where we find the violet flame retreat of Saint Germain and the Great Divine Director.

Rakoczy Mansion and Temple of the Maltese Cross in

Six

Invoking the Violet Flame

The violet flame is a fundamentally transformative and uplifting spiritual energy that accelerates life at the etheric, mental, emotional and physical level. It takes the power of prayer, which has been scientifically proven, and accelerates it many times over.

Mantras have a mystical power to them. They invoke the power and spirit of our innate divinity—the spirit of God that resides within us as the divine threefold flame in the heart, and the spirit of God that hovers above us as our Mighty I AM Presence and Holy Christ Self.

Mantras are spoken out loud and release the power of the God through the throat chakra. That is because God is in the Word, as the original divine essence. "In the beginning was the Word, and the Word was with God, and the word was God," says the Gospel of John. "You will also

decree a thing, and it will be established for you; And light will shine on your ways," says the book of Job.

In the East, the Vedas affirm the same principle. "Prajapatir vai idam asit: *In the beginning was Brahman.* Tasya vag dvitya asit: *with whom was the Vach or the Word...* Vag vai paramam Brahma: *and the word is Brahman.*" Vach, in Sanskrit, means sound, voice, word, mystic sound (svara), and essence of the divine creative activity.

Every time we speak a mantra, prayer or decree out loud, we draw upon Vach so that God can act in our life in an expedient way.

We can give violet flame mantras as a spoken fiat and also accelerate them as a chant, creating a rising spiral of energy that spins faster and faster. Depending on the energy we are dealing with, we can make a strong fiat that cuts through the negative substance like a knife, or we can accelerate the mantras to a buzzing, whirring sound. We can speak the mantras with emphasis and sobriety, or we can sing them with childlike joy. (For more examples on how the violet flame can be given, please visit our blog talk radio program, www.blogtalkradio.com/violetflamemiracles)

There are many different kinds of violet flame mantras and decrees. They are especially effective when we visualize them. We can see in our mind's eye the violet flame around us. We want to call it forth and see it. We can close our eyes, and it's like we're imagining it taking shape and form. Imagination, like Einstein said, is one of the greatest powers that we have. It's actually "eye magic

in action."

So whenever possible, we couple the action of the spoken word with visualization. This activates our third eye chakra and accelerates our spiritual work. We can image the violet flame in our mind's eye going around the planet. We see it penetrating whatever situation is going on in our life or in our psyche, any problem that we're working through psychologically. We can see the violet flame going into the oceans, the seas, the sky, the upper atmosphere. We can see it penetrating into people's hearts and minds, melting hardness of heart and shifting their awareness. We imagine it going into places of war and strife. We imagine it going into our government.

We also want to infuse our mantras and decrees with

The Violet Flame Opportunity

To experience a significant benefits in your life, invoke fifteen minutes of violet flame for forty days. Mark your calendar. Write down the specific issues that you would like to see resolved and visualize the violet flame going through these issues. Then give your decrees. Surrender your problems to the violet flame. Invoke God's will for your life and see what miracles will transpire.

love, and feel a burning love expanding in our heart chakra. Love is God, and God is love. When we love, we are truly God in action, and God's energy fulfills itself through us to work miracles in our life.

For those who have never invoked the violet flame, all it takes is fifteen minutes a day. We can do more. Some people invoke the violet flame for an hour or more, like when traveling long distance—but all it takes ongoing is fifteen minutes.

We start with a mantra, and we consecrate it with a prayer. This prayer is an invocation, where we call upon the masters who serve the violet flame to help us direct the violet flame into specific situations and conditions.

We can call to Archangel Zadkiel and Holy Amethyst. These are the archangels of the violet flame. We can call to the Elohim Arcturus and Victoria, the Elohim of the violet flame. We can call to Beloved Kuan Yin, the Goddess of Mercy, who is also a great being of the violet flame. We can call upon the elementals, the salamanders of the fire element to come forth and multiply the violet flame.

There are many, many masters. Every master in heaven, in fact, has a violet flame sphere within their causal body, and so when we call upon any master, we can call forth their violet flame momentum from within that causal body. We can call to Jesus, who taught the violet flame to his disciples. We can call for a release of the violet flame from his causal body to multiply our own works, and the same with Mother Mary, Gautama Buddha, Zarathustra and all of the masters who are a part of the heaven world.

The violet flame is really the flame of freedom, transmutation and forgiveness held within the entire body of God, and within our own God self. That's why when we invoke the violet flame, we are drawing it down not only from the causal body of ascended beings, but from our own God Self as well.

We can say, for example, "I'm sending the violet flame today into the congress because I know there is a specific bill being passed. I'm sending the violet flame into the inner city of Chicago and into all of the inner cities of America and the world where children are victims of violence and depravity." Whatever we see in the news that needs spiritual attention, we send forth the violet flame for the transmutation of strife and conflict. We consecrate our prayers to the violet flame angels so they can direct the violet flame we invoke anywhere they know it needs to be sent.

Let's be creative! Whenever we invoke the violet flame in the name of the I AM THAT I AM, the possibilities are endless. I AM THAT I AM is the primordial name of God, written in our innermost parts. It was the name God gave to Moses in the burning bush and corresponds to the Eastern, Om Tat Sat Om. We can always begin with this beautiful invocation, "In the name of my Christ Self and in the name of the living God, I AM that I AM, I call forth the energies of the sacred fire from the altar within my heart to consecrate these violet flame decrees."

We decree what we will and it shall be done, so long as it is in keeping with the divine plan and will of God for our life, and fulfills a purpose that has honor, integrity,

truth and compassion.

The more we give the violet flame, the more we can feel it acting quickly. It's a matter of momentum. When I give the violet flame with full earnestness, care and concentration, within a few minutes, I can feel it pulsing in my aura. I can feel it in my crown chakra at the top of my head. I can feel it rising up from beneath my feet. I can feel it very clearly in my auric field.

When we finish giving our violet flame mantras, we ask for the spiritual work that we've done, for the spiritual energy that we've invoked to be multiplied by every spiritual dispensation that has ever been given for the multiplication of the violet flame. A number of masters in the heaven-world have pledged a certain level of multiplication of the work that we do down here by their own momentum of the violet flame. It's like matching violet flame funds. They're don't do all the work for us, but they multiply what we will invoke. They may double the violet flame we call forth, or give us a hundred times more, or even a hundred thousand times more, but we must invoke it first, and then call for the multiplication.

For example, "In the name of my Mighty I AM Presence and Holy Christ Self, I call to Saint Germain, Omri Tas, Lord Maitreya and the entire spirit of the Great White Brotherhood, and I ask now for this violet flame I have just invoked to be multiplied by the power of the ten, the power of the ten thousand times ten thousand and every dispensation that has ever been given for the multiplication of the violet flame. According to God's holy will let it be done. Amen."

Every time we do this, our violet flame can count for a whole lot more! So we start with an invocation, calling the masters who serve the violet flame to help us, and then we give the violet flame, and then we call for its multiplication. It's a three-part formula.

A Three-Part Formula

1. Make an invocation to the masters and angels who serve the violet flame to direct the violet light into specific personal and world conditions
2. Give fifteen minutes of violet flame mantras.
3. Ask the masters and angels in the heaven-world to multiply your violet flame mantras by every spiritual dispensation given for the multiplication of the violet flame.

Seven

Violet Flame Mantras

Below are some beautiful violet flame mantras and affirmations you can offer to God. Give them in a loud voice with authority as a fiat. Repeat them in an accelerating decree spiral. You can even set them to music and sing them.

Let there be light!
And let that light be the violet light, O God!

I AM a being of violet fire
I AM the purity God desires.
Earth is a planet of violet fire
Earth is the purity God desires.

I AM THAT I AM, In the name Saint Germain,
Blaze and expand now the violet flame!
With the knowledge and blessings of God that I AM
I invoke cosmic energy for the freedom of man!
I AM calling for an ocean of violet flame
To transmute fear and error, and all blame and shame.
With the knowledge and blessings of God that I AM
I invoke cosmic energy for the freedom of man!

With Saint Germain I transmute
Human drudgery and dross
By the miraculous blessing
Of his Maltese cross!

Charge! Charge! Charge!
And let victory be proclaimed!
We invoke the light for freedom
In the name of Saint Germain.
We stand for love, we stand for life,
With violet flame, we'll end all strife!

Save the world with violet flame
By the power of the three times three.
God's waltzing, spinning energy
Will set all life now free.

"Breath of God inside each cell,
I AM the violet flame.
Searching out all hidden pain
I AM the violet flame."
Each time I give this mantra,
I know I'm blessing too
The souls in South America,
Whose hearts beat love so true.

Saint Germain, hurl your miracle pouch into the earth!
Saint Germain, hurl your miracle pouch into my life!
Saint Germain, hurl your miracle pouch to end all strife!
Dissolve those bombs, their cause and core,
Let them now be no more.
With violet flame all war can cease
From age-old hatreds bring surcease.

Light Set me free! Light set me free! Light set me free!
Charge now my human aura with God's violet, purple, pink!
Expand God's freedom in my heart today
Help me love and forgive on the I AM way
I forgive all life
And all life forgives me,
By the violet flame power
Of the three times three!

O violet flame of freedom,
Thou radiant fountain of youth:
Charge now my four lower bodies
With the beauty of spiritual truth.
O atoms, cells, electrons, Within this form of mine,
Let violet flame pass through me,
Its essence most sublime.

Beloved I AM Presence bright
Round me seal your tube of light.
Keep me faithful, true each day
As I invoke the violet ray.

Aquarius is the age of the violet flame
That we invoke in God's I AM name!
Aquarius is the age of the violet flame
That we sustain in God's I AM name!
Aquarius is the age of the violet flame
That we expand in God's I AM name!

Let the violet flame now arise and sing,
In my heart of hearts, its love now springs.
Make my aura bright with violet light
And my soul rejoice in perfection.
Mercy, forgiveness, freedom and grace
For my life is God's lovely intention!

Showers of violet rain now descend
Seven oceans of violet waves,
Transmuting the fall of Lemuria, Atlantis
Pave the way for a new golden age!

Showers of violet rain now descend
Seven oceans of violet waves,
The Earth is now bathed in this miracle light
Dark impurities vanish away!

We call now for the transmutation of all opposition to
the full awareness and giving of violet flame mantras on
earth as they are being given in the etheric retreats.

Let the lightbearers in embodiment be quickened at
the soul level to remember the violet flame, to be willing
to invoke and to become living, walking pillars of the
violet flame. We ask this now in Jesus' name according to
God's Holy Will. Amen.

God is a consuming fire. The more we invoke the
violet flame, the more we are resonating with that flame
of the Holy Spirit, that flame of transmutation, and
forgiveness and freedom, that will ultimately free us from
the rounds of rebirth and from the heaviness of our
negative karma.

Thank you for becoming violet flame devotees. And
thank you, beloved Saint Germain for the gift of the
miracle violet flame.

For our God is a consuming fire.

-Book of Hebrews
